

## Borrowing Solutions

### Leases

When borrowing isn't the best solution, lease financing could help your business overcome budget restrictions.

You can't always predict when you'll need equipment but with lease financing, you can obtain what you need now even if it is not budgeted.

For example:

- Heavy equipment for construction, mining, forestry and energy sectors
- Grain bins and harvest equipment
- Utility trucks and trailers
- Medical, laboratory and diagnostic equipment

Through Servus Credit Union's partnership with Concentra Financial Commercial Leasing we can design a lease for almost any type of business and equipment.

#### Need a letter of credit?

If your suppliers request a letter of credit, Servus can supply you with what you need.

### Benefits to your business

- Make lower payments, allowing for extra cash and cash flow management.
- Get the latest equipment and replace or upgrade at the end of your lease term.
- Preserve your credit—leasing expands your available capital without interfering with your established credit lines.
- Pay as you profit by putting your equipment to work and paying as it generates revenue.
